DETAILED ACTION

- 1) Acknowledgement is made of Amendment received 11/27/2007. Claim 29 is amended, claims 36-42, 55 are cancelled, and claims 43-54, 56-58 are withdrawn.

Allowable Subject Matter

- 2) The following is a statement of reasons for the indication of allowable subject matter:

The primary reason for indicating allowable subject matter is that the cited prior art does not show a method for controlling the moisture gradient in making of a paper web that includes: pre-moisturizing, with a pre-moisturizer, the paper web in a cross direction to a selected pre-moisture content; passing the pre-moisturized paper web through a multi-nip calender having a first roll stack and a last roll stack, each roll stack having at least three rolls, and wherein the multi-nip calender is situated before a slitter-winder of the web; intermediate-moisturizing the web, with an intermediate-moisturizer, in the cross direction before the last roll stack and after a first calendering nip of the first roll stack to a selected intermediate moisture content; drying the web in the last roll stack to a selected final moisture value; **and controlling the moisture gradient of the web in the thickness-direction in the multi-nip calender by adjusting the pre-moisturizing of the web, based on a calculated or measured value of the selected final moisture value of the web** (claim 29).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3) Claims 29-35 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 31-44 of copending Application No. 10/598,664. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present application and the copending disclose the process of making a paper wherein in the step of calendaring over a multi-roll calender, web pre-moistening, web intermediate moistening and control of the pre-moisturizing takes place based on the final moisture value of the web.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Amendment

- 4) Claims 29-35 rejection under 35 U.S.C. 112, second paragraph, is withdrawn in view of amended claim.
